PURPOSE, NEED, SCOPE, RELATIONSHIP OF PROJECT TO AGENCY OBJECTIVES

The University of South Florida seeks the funding necessary to continue the development of its USF Polytechnic campus.

The Phase I Science & Technology Building serves to provide the anchor and icon facility for the new campus site. It will provide the basis for programs that will address the STEM (Science, Technology, Engineering and Mathematics) needs of the region and the state of Florida. The central Florida area and, in general, the state of Florida is sorely lacking in the facilities and programs to promote a more educated and well-prepared workforce to serve the needs of economic growth and development and of the employers moving into the region. As the center of the high technology corridor, the USF Polytechnic campus is positioned to address these needs.

Phase I-D of the initial USF Polytechnic Core Campus will include Academic and Support Building Spaces as well as Non-Building Campus Spaces. Academic and Support Spaces required in Phase I development will include classrooms, teaching labs, research labs, Library/study areas, faculty/staff offices, and computing/telecommunications/instructional media. Additional funding is requested for initial Non-Building Spaces that would include site work, utility connections and ancillary work, parking, entrance and circulation roadways, utility corridors, storm water retention, green spaces, etc.

Funding distribution for Phase I has been planned from ~~Use of~~ ^{New} CIP requests for the new ~~Campus~~ ^{Campus}.
