

Name: _____ Date: _____

Name of principal investigator (professor/researcher): _____

USF Phone #: _____ Lab location (Building/room #): _____

Quiz (circle best answer)

1. At USF which classes of lasers must be registered with laser safety officer (LSO)?
 - a. Class 3R
 - b. Class 2M
 - c. Class 1
 - d. Class 1M
 - e. Class 3B and 4
2. A class 1 laser under normal operating conditions is not considered a hazard (true or false)?
3. A class 2 laser beam is invisible (true or false)?
4. A laser needs an energy source to produce a beam (true or false)?
5. A laser medium in an excited state spontaneously decays directly to a ground state (true or false)?
6. Incandescent and laser light are both monochromatic (true or false)?
7. Laser light cannot damage the cornea of the human eye (true or false)?
8. A class 4 laser beam can cause a fire (true or false)?
9. The PI must maintain procedures for all class 3B and 4 lasers in use (true or false)?
10. Class 3b and/or class 4 lasers must be posted with appropriate warning signs (true or false)?
11. A laser control area does not require any supervision (true or false)?
12. Beam stops (backstops) must be constructed from diffusely reflecting material (true or false)?
13. It is OK to look at a class 4 lasers without appropriate laser safety eyewear (true or false)?
14. **LASER** stands for Light Amplification by Stimulated Emission of Radiation (true or false)?
15. Laser hazard classification is part of the ANSI standard Z136.1 (true or false)?
